REACH COMPLIANCE STATEMENT

The European Union legislation entitled "Registration, and Authorization of Chemicals" – entered in to effect On June 1, 2007. The REACH regulations require registration (with some exceptions) of every chemical substance imported into the European Union in quantities greater than 1000 kg. The obligation to register the materials is on the individual or entity actually manufacturing or importing such material in Europe.

G.T. Microwave, Inc. has evaluated the products manufactured by our company regarding their status under Registration, Evaluation, Authorization and restriction of Chemicals (REACH) when products are put on the market in the European Economic Area (EEA). Section 2.1 of the ECHA guidance document (Requirements for Substances in Articles) defines an article as "an object which during production is given a special shape, surface or design which determines its function to a greater degree than its chemical composition". All G.T. Microwave products are considered articles under this definition and have been found not to contain Substances of Very High Concern (SVHC) as listed on the Candidate List of Substances of Very High Concern at concentrations above 0.1% (w/w).

Section 4.1 of the guidance document covers substances in articles that are (a) intended to be released from articles during normal conditions of use, and (b) the total amount of the substance produced or imported in all articles exceeds 1 ton per year. The articles manufactured by G.T. Microwave do not exceed these limits; therefore, do not require registration or notification. REACH regulations do not require G.T. Microwave to register, notify or communicate substance information on products meeting these conditions that are offered in the EEA per section 4.2 of the ECHA guidance document. This statement covers all articles offered and manufactured by G.T. Microwave in our literature or on our official website.

G.T. Microwave, Inc. meets all applicable REACH requirements and is committed to providing our customers with information about substances in its products as required.

If you have any questions concerning our compliance, please feel free to contact George Apsley, Chief Engineer & Product Development, via email at engineering@gtmicrowave.com.
